**Amendment A:  
Submission of Marked up Patent Specifications and Claims**

Honorable Commissioner for Patents  
Washington, D.C. 20231

In response to Office Action dated 1/30/2002 the applicant respectfully request consideration of the attached marked up specifications and claims. Changed text is in red. Added text is underlined. Deleted text is crossed out with a hyphen. A clean copy is also enclosed with the changes implemented.

The references have been omitted as they did not contribute to the description of the process.

Three figures have been added to illustrate the invented process.

Claims 1 through 6 are canceled and replaced with claim 6 which is now labeled as claim 1.

New sections have been added: Background of the Invention, Description of Drawings. Background of the Invention also now includes a subsection Prior Art.

Two equations in word form have been added to Detailed Description to further aid the reader in understanding the process of the invention so that one skilled in the art could implement the process. Further non-essential but useful details have been added as to the processing of the measured images to aid in using the invention.
